| The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply  |   |                                     |  |  |  |  |  |
| A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). |   |                                     |  |  |  |  |  |
| Status  |   |                                     |  |  |  |  |  |
| 1) Responsive to communication(s) filed on 09 Ju  | <u></u>   |                                     |  |  |  |  |  |
| 2a) ☐ This action is <b>FINAL</b> . 2b) ☑ This  | This action is <b>FINAL</b> . 2b)⊠ This action is non-final.  |                                     |  |  |  |  |  |
|   | Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213. |                                     |  |  |  |  |  |

Art Unit: 2833

## **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's Admitted Prior Art (Figures 1-2) in view of Wu (US 6,589,075).

Regarding claims 1-2, 4, 6-10, Applicant's APA disclose a combination structure comprising:

```
a container (10) is case of power supply;
an opening (101);
a socket (13);
a connecting section (130);
a circuit board (11);
a bolt (15);
```

the connecting section being connected to the container by means of screw, rivet or bolt (disclosed in the Background of the Invention section).

Applicant's APA substantially disclose the claimed invention except for the second end having a cross-section larger than the first end so that the first end passing through the opening from inside of the container, and the second end is not passing through the opening.

Application/Control Number: 10/615,679

Art Unit: 2833

Wu teaches a socket (1) having a first end (threaded portion) and a second end (unthreaded portion, see Figure 1). The first end having smaller cross-section than the cross section of the second end and is passing through an opening (D1) of the container (D).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify connector of the Applicant's APA with a cross-section of the second end is smaller than a cross-section of the first end, the first end is passing through the opening from the inside container, as taught by Wu for securing the connector within the container.

Regarding claims 3 and 5, in the modified combination structure, the Applicant's APA substantially disclose the claimed invention except for the connecting section being connected to the container by attaching mechanism such as a hooks mechanism, or a bayonet mechanism.

Whether modified combination structure having said attaching mechanism or not would have been a matter of design absent the criticality, since the operation of the combination structure of socket and container is still the same.

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Truc T. T. Nguyen whose telephone number is 571-272-2011. The examiner can normally be reached on 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paula Bradley can be reached on 571-272-2800 extension 33. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Application/Control Number: 10/615,679

Art Unit: 2833
